

## SUMMARY

Skilled **Software Engineer** with strong expertise in **full-stack development**. Experienced in **front-end** technologies and **back-end** development. Well-versed in relational and NoSQL databases, and proficient in **mobile app** development using **React Native** and **MySQL**. Committed to building scalable, high-performance applications and delivering effective software solutions.

## EDUCATION

### SRTM University, Nanded, Maharashtra

- Master Of Computer Application | CGPA : **8.35** | June 2022 - May 2024

### MIT College OF CS & IT, Basmath, Maharashtra

- Bachelor Of Computer Application | CGPA : **9.22** | June 2019 - May 2022

## TECHNICAL SKILLS

- **Databases:** MongoDB, PostgreSQL
- **Languages:** JavaScript, TypeScript
- **Frameworks:** Node.js, React.js, Express.js
- **Styling:** CSS, Tailwind CSS, Bootstrap, HTML
- **Tools:** Figma, Postman, Swagger
- **Version Control:** Git, GitHub

## WORK EXPERIENCE

### Software Engineer | Sirensys

January 2025 - Present

- **Tech Stack:** Node.js, TypeScript, React, PostgreSQL, JWT, REST APIs.
- **Greenx** : Developed real-time tracking for waste collection, optimized vehicle routes to reduce fuel costs, integrated analytics for performance insights, and implemented alerts for missed pickups and breakdowns.
- **GPS Calculator** : Developed a React Native mobile app for calculating distance, area, and circumference using real-time GPS data. Integrated Expo Location API for tracking, turf.js for geospatial calculations, and react-native-maps for map visualization. Stored measurement history with SQLite and provided easy navigation through React Navigation.

### Full Stack Intern | Sirensys

June 2024 - December 2024

- **Tech Stack:** Node.js, TypeScript, React, PostgreSQL, JWT, REST APIs.
- **Vehicle Tracking App** : Developed a secure Vehicle Tracking API with role-based access control, enabling precise vehicle tracking and management. Optimized backend with efficient RESTful endpoints for managing vehicle data, tracking history, and user permissions. Integrated role-based frontend navigation to deliver a streamlined and intuitive UI for both admin and tenant users

## PROJECTS

### Petroleum Management System | [Live Link](#) | [GitHub Link](#) | May 2024 - July 2024

- **Tech Stack** - TypeScript, Reactjs, PostgreSQL
- Engineered a robust Petroleum Management System with TypeScript, Fastify, and TypeORM to manage and track petroleum products and services; increased data accuracy by 50% and customer satisfaction by 20%.

### Personal Portfolio Web Application | [Live Link](#) | [GitHub Link](#) | March 2024 - April 2024

- **Tech Stack** - HTML5, CSS3, Javascript, PostgreSQL
- As a developer, I've meticulously crafted my personal portfolio using HTML5, CSS3, and JavaScript. Explore my skills, projects, and passion for creating innovative digital solutions.

## CERTIFICATES

### Full Stack Crash Course (Udemy) | [CERTIFICATE](#)

August 2024

- Comprehensive Full Stack Crash Course covering front-end, back-end, and database development with hands-on project experience.

### Backend With Node Js (Udemy) | [CERTIFICATE](#)

August 2024

- Developed and implemented scalable backend REST APIs using Node.js, enhancing application performance and reliability.
